ABOUT US

Tata Steel Downstream Products Limited (TSDPL) was originally set up in 1997 as Tata Ryerson Limited, a joint venture between Tata Steel of India and Ryerson Inc. of USA. In 2009, Tata Steel acquired the entire equity of Ryerson Inc. and thus was born TSDPL. A 100% subsidiary of Tata Steel, TSDPL was created to bring Steel Service Centre solutions for the first time to industrial customers and is the first organized Steel Service Centre capable of high-end processing in India. Such centres, a popular and time-tested concept in industrially developed countries around the world, was hitherto unknown to the value-seeking Indian industrial customers. Thus, the foundation of a new emerging industry was laid by TSDPL, which continues to follow its mission of building a trusted and irreplaceable bridge between steel producers and steel consumers. With 10 large processing units, 14 sales and distribution locations and a host of partners like external processing agencies, suppliers and other stakeholders, today TSDPL is India's largest Steel Service Centre organization. TSDPL has started new business lines in developing and marketing products under TATA TRYNOX® brand for Steel Safes and Lockers for storing valuables, Steel Racks for Data Management & allied products in line with emerging needs for Digital Infrastructure.
